An Interview with Author Kate DiCamillo

Kate DiCamillo is a *New York Times* best-selling children's author born in Philadelphia and now living in Minneapolis (where she faithfully writes two pages a day, five days a week). DiCamillo has published more than 25 novels, including the Newbery Award winning *The Tale of Despereaux* and *Flora & Ulysses*, making her one of only six authors to win the award twice! In 2014, she was named National Ambassador for Young People's Literature. In the following Q&A, DiCamillo discusses the series finale of her beloved *Tales from Deckawoo Drive*, reflecting on the series and offering insights into her craft.

Candlewick Press released the series finale of the *Tales from Deckawoo Drive, Mercy Watson is Missing!*, in December. How does it feel to wrap up such a widely popular series?

Oh, I'm sad. I truly am. I could write about Mercy and Deckawoo Drive (happily!) for the rest of my life. Maybe at some point, I can cajole Chris Van Dusen into revisiting the pig and her environs.

Can you remind us of the origin story of Mercy and where she first came from?

She appeared in the Watson's life when she fell off the back of a (Molson's Pig Transport) truck as a piglet. For me, she appeared in my imagination as a full-grown pig. I was on an airplane, and I closed my eyes and saw her face, and underneath her face, her name: MERCY. It made me laugh.

continued...

You have been collaborating on the Mercy Watson titles for various ages and formats with the incomparable Chris Van Dusen for almost 20 years. Why is he such an incredible artist to illustrate this series?

Listen: no Chris Van Dusen, no Mercy Watson. That's the truth. He is, indeed, incomparable. And it has been one of the supreme delights of my life to make up characters and think: wow, I can't wait for Chris to bring this person to fantastic, colorful, loving, humorous life.

Did you enjoy writing the Mercy titles between your other novels over the years – how was working on these books different from your other fiction?

This is the wondrous thing about Mercy – all you have to do is think of a situation and put her in it and then follow her as she follows her snout through the story. It has also been delightful to me to see how beloved grumpy Eugenia Lincoln is. Kids love her.

What do you hear most from fans about the Mercy Watson and Deckawoo Drive titles?

Well, there's that thing about Eugenia Lincoln and how much they love her. And then, too, there's this thing where kids have figured out the same thing I have: you can tell a story about Mercy just by imagining a scenario and following her through it. Some of my favorites from kids have been *Mercy Watson Meets Moby Dick* and *Mercy Watson Gets Audited*.

Do you have any other titles or series coming soon for younger readers?

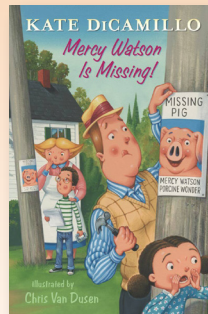

I've got a new early reader called *Orris and Timble*, about a rat and an owl who become friends. And my newest novel entitled *Ferris* published in early March.

Mercy Watson Is Missing! (Book 7)

Kate DiCamillo • Candlewick Press • LE

Every favorite character from Kate DiCamillo's *New York Times* best-selling *Mercy Watson* books makes an appearance in this extended, riotously funny series crescendo. When Mercy Watson the pig goes missing, all of Deckawoo Drive is in an uproar. The Watsons are inconsolable, and the local police, fire, and animal control departments are no help whatsoever. Eugenia Lincoln is not quite as sad as she might be, but thankfully her sister has the idea to hire a private investigator. Meanwhile, Frank and Stella Endicott and Horace Broom are ready to do some investigating of their own. Will the clever neighborhood sleuths manage to follow the trail of hoofprints – and a certain overwhelmingly enticing scent – and recover their porcine wonder?

Toothed or Baleen? A Whale Compare and Contrast Book

Cathleen McConnell • Arbordale Publishing • LE

Marine mammals known as cetaceans are broken into two large groups: toothed whales (including dolphins and porpoises) and baleen whales. One group has a single blowhole to breathe air; the other has two. One group has tall dorsal fins to help maintain balance as they chase prey. The other scoops up water and prey in their large mouths as they swim slowly along – they don't need large dorsal fins. One group uses echolocation; the other doesn't. Learn more about what these animals have in common and how they are different in this latest installment of the *Compare and Contrast* series.
